Re: Approval of Nosler 155grn Projectile

Dear Members,

The National Rifle Association of Australia (NRAA) wishes to advise the approval of the Nosler 155grn projectile for use under Standard Shooting Rules for Australian Rifle Clubs (SSR's).

As you are all aware there has been considerable concern over the past year or so regarding supply of the Sierra 155grn projectile from our supplier. Delays in shipment and the very uncertainty of continual supply to meet demand, beyond the control of NRAA, has prompted the NRAA to consider the introduction of a further approved projectile. We have investigated the ammunition available from various sources and are completely satisfied that the quality, accuracy and most importantly availability of supply is assured.

NRAA have entered into a contractual agreement with Nioa the Australian Agent, at a most competitive and comparable price to our existing suppliers on your behalf.

Notification of price structure and availability will be advised within the next 2 to 3 weeks from NRAA. Our first shipment is expected to arrive in Australia this side of Christmas and you will be notified immediately it becomes available for purchase. This decision is to take effect immediately.

Many Thanks

Catherine Berry
Executive Officer
