

Cross Firing Duncan Range,

The following is an outline of the target arrangement on 8/9/1000 yard firing point as to the target alignment for the targets adjacent to the two flag lines located on the body of the range, Targets 14/15 and 28/29 are the targets located either side of the two range flag lines. In certain wind conditions it was discovered that the wind flags were encroaching on the sighting of the competitors using the aforementioned targets. The Board of the QRA (venue provider) has endorsed the following arrangement to overcome this problem.

Top Row = Targets
 Bottom Row = Firing Point
